

ARE YOU LOOKING FOR AN INTERNSHIP?

THAT'S US

We are an ambitious team that wants to realise an idea of which we are convinced it will be of vital importance for the bioeconomy of the 21st century. Through cutting-edge biotechnological methods we aim to develop a novel method to produce liquids like milk and antidotes. This method will work 100% without animals and without any greenhouse gas emission!

IS THAT YOU?

We are looking for **motivated** (ideally Master) **students** that want to become part of a young team and **work on challenging scientific questions**. Important qualifications:

- You should **have fun to develop new things** and try new approaches
- You like to be challenged by and **find solutions for unexpected problems**
- You like to **work in a team** and **take over responsibility**
- It is a plus if you have first experiences with cell culture
- It is a plus if you have first experiences with membranes/scaffoldings
- It is a plus if you have first experiences with bioreactors

THEN CONTACT US!

If you think you would be a good addition to our team and are motivated to realise an exciting new project, contact us! Either send a short e-mail with your resume or reach us via LinkedIn
